

Issue 1 (published February 2009)

- Thomas H. Rich, Patricia Vickers-Rich, Timothy F. Flannery, Benjamin P. Kear, David J. Cantrill, Patricia Komarower, Lesley Kool, David Pickering, Peter Trusler, Steven Morton, Nicholas Van Klaveren, and Erich M.G. Fitzgerald**
An Australian multituberculate and its palaeobiogeographic implications 1–6
- J.G.M. Thewissen and Sunil Bajpai**
A new Miocene sirenian from Kutch, India 7–13
- Gerald Mayr and Nikita Zelenkov**
New specimens of zygodactylid birds from the middle Eocene of Messel, with description of a new species of *Primozygodactylus* 15–20
- Richard J. Butler and Robert M. Sullivan**
The phylogenetic position of the ornithischian dinosaur *Stenopelix valdensis* from the Lower Cretaceous of Germany and the early fossil record of Pachycephalosauria 21–34
- Paul M. Barrett, Richard J. Butler, Wang Xiao-Lin, and Xu Xing**
Cranial anatomy of the iguanodontoid ornithomimid *Jinzhouosaurus yangi* from the Lower Cretaceous Yixian Formation of China 35–48
- Tatsuya Hirasawa**
The ligamental scar in the costovertebral articulation of the tyrannosaurid dinosaurs 49–59
- Zuoyu Sun, Weicheng Hao, Yuanlin Sun, and Dayong Jiang**
Silicified Anisian (Middle Triassic) spiriferinid brachiopods from Guizhou, South China 61–68
- Jarosław Stolarski, Przemysław Gorzelak, Maciej Mazur, Yves Marrocchi, and Anders Meibom**
Nanostructural and geochemical features of the Jurassic isocrinid columnal ossicles 69–75
- Aaron W. Hunter and Charlie J. Underwood**
Palaeoenvironmental control on distribution of crinoids in the Bathonian (Middle Jurassic) of England and northern France 77–98
- Marcela Cichowolski**
A review of the endocerid cephalopod *Protocyrtendoceras* from the Floian (Lower Ordovician) of the Eastern Cordillera, Argentina 99–109
- Paweł Filipiak and Agata Jarzynka**
Organic remains of tentaculitids: New evidence from Upper Devonian of Poland 111–116
- Christian Klug, Hartmut Schulz, and Kenneth De Baets**
Red Devonian trilobites with green eyes from Morocco and the silicification of the trilobite exoskeleton 117–123
- Mansoureh Ghobadi Pour and Leonid E. Popov**
First report on the occurrence of *Neseuretinus* and *Ovalocephalus* trilobites in the Middle Ordovician of Iran 125–133
- Peter Pervesler and Alfred Uchman**
A new Y-shaped trace fossil attributed to upogebiid crustaceans from Early Pleistocene of Italy 135–142
- Jordi Martinell and Rosa Domènech**
Commensalism in the fossil record: Eunicid polychaete bioerosion on Pliocene solitary corals 143–154
- Brief reports**
- Steven E. Fields**
Hypsodonty in the Pleistocene ground sloth *Megalonyx*: Closing the “diastema” of data 155–158
- Lars W. van den Hoek Ostende, Marc Furió, and Israel García-Paredes**
New data on *Paenelimnoecus* from the middle Miocene of Spain support the shrew subfamily Allosoricinae 159–164
- Juan Carlos Cisneros and Linda Akiko Tsuji**
Nycteroleter affinities of a Permian parareptile from the South African Karoo Basin 165–169

Mariusz A. Salamon, Przemysław Gorzelak, and Michał Zatoń

In quest of cyrtocrinid origins: Evidence from Late Triassic ossicles from the Tatra Mountains. 171–174

Discussion

Simon Conway Morris: The Burgess Shale animal *Oesia* is not a chaetognath: A reply to Szaniawski (2005). 175–179

Book reviews

Ephraim Nissan: North American Tertiary micro- and sea-mammals 14

Andrzej Falniowski: Mollusca: A state-of-the-art summary 110

Editorial note: Quotation of Russian references 170

Issue 2 (published June 2009)**Lionel Hautier, Pere Bover, Josep Antoni Alcover, and Jacques Michaux**

Mandible morphometrics, dental microwear pattern, and palaeobiology of the extinct Balearic Dormouse *Hypnomys morpheus*. 181–194

Guillermo W. Rougier, Analía M. Forasiepi, Robert V. Hill, and Michael Novacek

New mammalian remains from the Late Cretaceous La Colonia Formation, Patagonia, Argentina 195–212

Michael P. Taylor, Mathew J. Wedel, and Darren Naish

Head and neck posture in sauropod dinosaurs inferred from extant animals 213–220

Stephen L. Brusatte, Richard J. Butler, Tomasz Sulej, and Grzegorz Niedźwiedzki

The taxonomy and anatomy of rauisuchian archosaurs from the Late Triassic of Germany and Poland 221–230

Mahito Watabe, Takanobu Tsuihiji, Shigeru Suzuki, and Khishigjav Tsogtbaatar

The first discovery of pterosaurs from the Upper Cretaceous of Mongolia 231–242

Adam Urbanek and Piotr Mierzejewski

The ultrastructure and building of graptolite dissepiments 243–252

Samuel Zamora, Rodolfo Gozalo, and Eladio Liñán

Middle Cambrian gogiid echinoderms from Northeast Spain: Taxonomy, palaeoecology, and palaeogeographic implications 253–265

Michał Zatoń and Paul D. Taylor

Middle Jurassic cyclostome bryozoans from the Polish Jura 267–288

Adam T. Halamski and Andrzej Baliński

Latest Famennian brachiopods from Kowala, Holy Cross Mountains, Poland 289–306

Uwe Balthasar and Nicholas J. Butterfield

Early Cambrian “soft-shelled” brachiopods as possible stem-group phoronids 307–314

Stefano Monari

Phylogeny and biogeography of pholadid bivalve *Barnea* (*Anchomasa*) with considerations on the phylogeny of Pholadoidea 315–335

Paweł Wolniewicz

Late Famennian stromatoporoids from Dębnik Anticline, southern Poland 337–350

Brief reports**Kenneth D. Rose, Rajendra S. Rana, Ashok Sahni, Kishor Kumar, Lachham Singh, and Thierry Smith**

First tillodont from India: Additional evidence for an early Eocene faunal connection between Europe and India?. 351–355

Silvio Renesto and Spencer G. Lucas

Cynodont teeth from the Carnian (Late Triassic) of northern Italy 357–360

Book review

Martin Sabol: Hic sunt leones et hyaenae 356

Discussion

Hubert Szaniawski: Fossil chaetognaths from the Burgess Shale: A reply to Conway Morris (2009) 361–364

Issue 3 (published September 2009)**Reinhard Ziegler**

- Plesiosoricids from early Oligocene fissure fillings in South Germany, with remarks on plesiosoricid phylogeny 365–371

Steven C. Sweetman

- A new species of the plagioulacoid multituberculate mammal *Eobaatar* from the Early Cretaceous of southern Britain. 373–384

Yaoming Hu, Jin Meng, and James M. Clark

- A new tritylodontid from the Upper Jurassic of Xinjiang, China 385–391

Jun Liu, Bruce Rubidge, and Jinling Li

- New basal synapsid supports Laurasian origin for therapsids 393–400

Torsten van der Lubbe, Ute Richter, and Nils Knötschke

- Velociraptorine dromaeosaurid teeth from the Kimmeridgian (Late Jurassic) of Germany 401–408

Vanda F. Santos, José J. Moratalla, and Rafael Royo-Torres

- New sauropod trackways from the Middle Jurassic of Portugal 409–422

Anna Kozłowska, Alfred Lenz, and Michael Melchin

- Evolution of the retiolitid *Neogothograptus* (Graptolithina) and its new species from the upper Wenlock of Poland, Baltica 423–434

Gennady M. Dlussky and Alexander G. Radchenko

- Two new primitive ant genera from the late Eocene European ambers. 435–441

Steffen Kiel and Paul R. Dando

- Chaetopterid tubes from vent and seep sites: Implications for fossil record and evolutionary history of vent and seep annelids 443–448

S. Mariel Ferrari

- Cosmopolitan Early Jurassic marine gastropods from west-central Patagonia, Argentina 449–461

Andrzej Kaim, Robert G. Jenkins, and Yoshinori Hikida

- Gastropods from Late Cretaceous Omagari and Yasukawa hydrocarbon seep deposits in the Nakagawa area, Hokkaido, Japan 463–490

Vojtěch Turek

- Colour patterns in Early Devonian cephalopods from the Barrandian Area: Taphonomy and taxonomy 491–502

Štěpán Manda and Vojtěch Turek

- Minute Silurian oncocerid nautiloids with unusual colour patterns. 503–512

Cecilia M. Larsson, John S. Peel, and Anette E.S. Högström

- Trachyplax arctica*, a new multiplated problematic fossil from the lower Cambrian of North Greenland. 513–523

Christian B. Skovsted, Uwe Balthasar, Glenn A. Brock, and John R. Paterson

- The tommotiid *Camenella reticulosa* from the early Cambrian of South Australia: Morphology, scleritome reconstruction, and phylogeny 525–540

Józef Kaźmierczak and Barbara Kremer

- Spore-like bodies in some early Paleozoic acritarchs: Clues to chlorococcalean affinities 541–551

Brief reports**Alexander Averianov and Hans-Dieter Sues**

- First record of a basal neoceratopsian dinosaur from the Late Cretaceous of Kazakhstan 553–556

Yongjie Wang, Zhiqi Liu, and Dong Ren

- A new fossil lacewing genus and species from the Middle Jurassic of Inner Mongolia, China 557–560

Issue 4 (published December 2009)**Cyrille Delmer**

- Reassessment of the generic attribution of *Numidotherium savagei* and the homologies of lower incisors in proboscideans 561–580

Octávio Mateus, Louis Jacobs, Michael Polcyn, Anne S. Schulp, Diana Vineyard, André Buta Neto, and Miguel Telles Antunes The oldest African eucryptodiran turtle from the Cretaceous of Angola.	581–588
Nicole Klein and Paul C.H. Albers A new species of the sauropsid reptile <i>Nothosaurus</i> from the Lower Muschelkalk of the western Germanic Basin, Winterswijk, The Netherlands	589–598
Laura K. Säilä Alpha taxonomy of the Russian Permian procolophonoid reptiles	599–608
Sérgio Dias-Da-Silva and Ana Luiza Ramos Ilha On the presence of a pustulated temnospondyl in the Lower Triassic of southern Brazil.	609–614
Alice M. Clement A new genus of lungfish from the Givetian (Middle Devonian) of central Australia	615–626
David J. Cicimurri and James L. Knight Late Oligocene sharks and rays from the Chandler Bridge Formation, Dorchester County, South Carolina, USA.	627–647
Gary D. Johnson and David W. Thayer Early Pennsylvanian xenacanth chondrichthyans from the Swisshelm Mountains, Arizona, USA	649–668
Hubert Szaniawski The earliest known venomous animals recognized among conodonts.	669–676
Hans Arne Nakrem, Błażej Błażejowski, and Andrzej Gaździcki Lower Permian bryozoans from southern and central Spitsbergen, Svalbard	677–698
Diego C. García-Bellido, Jean Vannier, and Desmond Collins Soft-part preservation in two species of the arthropod <i>Isoxys</i> from the middle Cambrian Burgess Shale of British Columbia, Canada.	699–712
Shin-Ichi Kamikuri, Isao Motoyama, Hiroshi Nishi, and Masao Iwai Neogene radiolarian biostratigraphy and faunal evolution of ODP Sites 845 and 1241, eastern equatorial Pacific	713–742
Brief report	
Sergio Furtado Cabreira and Juan Carlos Cisneros Tooth histology of the parareptile <i>Soturnia caliodon</i> from the Upper Triassic of Rio Grande do Sul, Brazil	743–748
Contents of Volume 54.	749–752
