

Microproblematics *Bolboforma* and *Bachmayerella* from the Middle Miocene of Central Paratethys

Janina Szczechura

Acta Palaeontologica Polonica 31 (3-4), 1986: 213-228

Middle Miocene (Badenian) microproblematics, known as *Bolboforma* Daniels et Spiegler, 1974 and *Bachmayerella* Rogl et Franz, 1919, from the Central Paratethys (Poland, Czechoslovakia, Austria, Bulgaria and Romania) have been examined here. It has been stated that they are important for biostratigraphy, especially for distinguishing the Upper Badenian deposits from the older ones. *Bolboforma taenifera* sp.n. is described.

Key words: Calcareous microproblematics, plankton, paleoecology, taxonomy, biostratigraphy, Miocene, Central Paratethys.
