

## A new atrypid genus (Brachiopoda) from the Frasnian of Poland

Andrzej Baliński

*Acta Palaeontologica Polonica* 42 (3), 1997: 427-435

A new atrypid *Waiotrypa sulcicarina* gen. et sp. n. from the late Frasnian of the Holy Cross Mountains is proposed. The new genus is close to *Iowatrypa* Copper, 1973 from which it differs mainly in having a keeled pedicle valve and sulcate brachial valve. *Waiotrypa* is one of the latest atrypids prior to extinction of the order at the end of the Frasnian.

**Key words:** Atrypida, Brachiopoda, Late Devonian, Poland.
