## SUPPLEMENTARY ONLINE MATERIAL FOR

# Ordovician rafinesquinine brachiopods from peri-Gondwana 

Jorge Colmenar

Published in Acta Palaeontologica Polonica 201661 (2): 455-468. http://dx.doi.org/10.4202/app.00102.2014

## Supplementary Online Material

## Fossil localities

ITALY: Sardinia. - Sampled localities: Gon 1 ('Sa Siliqua’), small valley west of hill 'Sa Siliqua’ north-east of Gonnesa, lower part of Portixeddu Formation; Geographic coordinates $39^{\circ} 16^{\prime} 15^{\prime} \mathrm{N}, 8^{\circ} 28^{\prime} 21^{\prime}$ "E. Can 3 ('Eucalyptus'), temporary outcrop for plantation of eucalyptus trees about 800 m south-east of the sheep farm 'Ovile Cannamenda', lower part of Portixeddu Formation; Geographic coordinates $39^{\circ} 14^{\prime} 2^{\prime \prime} \mathrm{N}$, $8^{\circ} 30^{\prime} 20^{\prime}$ E. Por 7 (Punta Pedrona), Western and Southern slopes of Easternmost peak of the Punta Pedrona hill, middle-upper part of the Portixeddu Formation; Geographic coordinates $39^{\circ} 27^{\prime} 25^{\prime} \mathrm{N}, 8^{\circ} 26^{\prime} 22^{\prime}$ E. Por 9 ('Buggerru old road'), small outcrop in the vicinity of a house located at Buggerru old mountain road about 2.6 km north-east of Portixeddu village, middle part of Portixeddu Formation; Geographic coordinates $39^{\circ} 26^{\prime} 36^{\prime}$ " $\mathrm{N}, 8^{\circ} 26^{\prime} 29^{\prime}$ 'E. VCR/14 ('bunker'), outcrop at the vicinity of a bunker about

900 m east-northeast of Portixeddu village, Portixeddu Formation; Geographic coordinates $39^{\circ} 26^{\prime} 48^{\prime \prime} \mathrm{N}, 8^{\circ} 25^{\prime} 8^{\prime \prime} \mathrm{E}$.

FRANCE: Montagne Noire. - Sampled localities: Grand Glauzy hill, between Gabian and Neffiès villages, upper part of Glauzy Formation; Geographic coordinates $43^{\circ} 32^{\prime}$ 13 " $\mathrm{N}, 3^{\circ} 18^{\prime} 21$ " E .

Tranchée Noire, abandoned railway cutting immediately south of the D-13 road between Gabian and Faugères villages, Gabian Formation; Geographic coordinates $43^{\circ}$ $31^{\prime} 20^{\prime \prime} \mathrm{N}, 3^{\circ} 15^{\prime} 05^{\prime} \mathrm{W}$.

Armorican Massif. - Sampled localities: Ros 1 (Pointe de Raguenez), several fossiliferous points on the foreshore in the Pointe de Raguenez, lower part of Rosan Formation; Geographic coordinates $48^{\circ} 13^{\prime} 41^{\prime \prime} \mathrm{N}, 4^{\circ} 25^{\prime} 599^{\prime} \mathrm{O}$. Ros 2 (carrière de Rosan), outcrop at the Lime kiln quarry of the île de Rosan of the Crozon Peninsula, upper part of Rosan Formation; Geographic coordinates $48^{\circ} 14^{\prime} 11^{\prime \prime} \mathrm{N}, 4^{\circ} 25^{\prime} 43^{\prime \prime} \mathrm{W}$.

PORTUGAL: Portuguese Central Iberian Zone. - Sampled localities: Badanais, outcrop in the Penha Garcia Syncline about 5 km east of Penha García village, sandstone underlying the mudstone of the Vaca Member of the top of the Louredo Formation; Geographic coordinates $40^{\circ} 2^{\prime} 37^{\prime \prime} \mathrm{N}, 6^{\circ} 57^{\prime} 43^{\prime \prime} \mathrm{W}$. PSA, new forest track close to the road N -235 between the villages Contenças and Sazes do Lorvão, tuffs of the lower part of Porto de Santa Anna Formation; Geographic coordinates $40^{\circ} 19^{\prime} 29^{\prime \prime} \mathrm{N}, 8^{\circ} 20^{\prime} 24^{\prime \prime} \mathrm{W}$. Leira Mà vineyard, about 500 m north-west Louredo village, tuffs of the lower and middle part of the Porto de Santa Anna Formation; Geographic coordinates $40^{\circ} 21^{\prime} 16^{\prime \prime} \mathrm{N}, 8^{\circ} 22^{\prime} 9^{\prime \prime} \mathrm{W}$.

SPAIN: Pyrenees. - Sampled localities: Sant Pere 1, just back to some houses of Sant Pere village near Seo de Urgel, siltstones of the middle-upper part of Cavá Formation; Geographic coordinates $42^{\circ} 21^{\prime} 43^{\prime \prime} \mathrm{N}, 1^{\circ} 28^{\prime} 53^{\prime \prime}$ E. Sant Pere 2, eastern slope of a small valley, about 3 km east of Seo de Urgel city, siltstones of the middle-upper part of Cavá Formation; Geographic coordinates $42^{\circ} 21^{\prime} 38^{\prime \prime} \mathrm{N}, 1^{\circ} 29^{\prime} 39^{\prime \prime}$ E.

Iberian Chains. - Fombuena 4, Peña del Tormo Section, about 1 km west-northwest of Fombuena village, sandstone and interbedded sandy shale of the Huerva Member of the Fombuena Formation; Geographic coordinates $41^{\circ} 8^{\prime} 54^{\prime \prime} \mathrm{N}, 1^{\circ} 12^{\prime} 12^{\prime \prime} \mathrm{W}$. Fombuena 6, about 2 km south-west of Fombuena village, oolitic ironstone and bryozoan marl of the Peña del Tormo Member, the basal member of the Fombuena Formation; Geographic coordinates $41^{\circ} 7^{\prime} 57^{\prime \prime} \mathrm{N}, 1^{\circ} 12^{\prime} 8^{\prime \prime} \mathrm{W}$. Herrera 1, about 4 km north-west of Herrera de los Navarros village, sandstone and interbedded sandy shale of the Huerva Member of the Fombuena Formation; Geographic coordinates $41^{\circ} 14^{\prime} 10$ " $\mathrm{N}, 1^{\circ} 6^{\prime} 55^{\prime} \mathrm{W}$. Luesma 2 (La Rebosilla), labour field about 1.5 km south-west of Luesma village, calcareous sandstone of the Huerva Member of the Fombuena Formation; Geographic coordinates $41^{\circ} 9^{\prime} 21^{\prime \prime} \mathrm{N}, 1^{\circ} 9^{\prime} 33^{\prime \prime} \mathrm{W}$.

Aladrén 1, about 6 km north-west of Herrera de los Navarros village, calcareous siltstone of the lower part of Cystoid Limestone Formation; Geographic coordinates $41^{\circ} 14^{\prime} 48^{\prime \prime} \mathrm{N}, 1^{\circ} 8^{\prime} 36^{\prime \prime} \mathrm{W}$. Alpartir 1, about 1 km north-west of Alpartir village, calcareous siltstone of the lower part of Cystoid Limestone Formation; Geographic coordinates $41^{\circ} 25^{\prime} 56^{\prime \prime} \mathrm{N}, 1^{\circ} 23^{\prime} 13^{\prime \prime} \mathrm{W}$. Herrera 1 , about 4 km north-west of Herrera de los Navarros village, calcareous siltstone of the lower part of Cystoid Limestone Formation; Geographic coordinates $41^{\circ} 14^{\prime} 10 \times \mathrm{N}, 1^{\circ} 6^{\prime} 55^{\prime} \mathrm{W}$. Luesma 1, about 600 m
south-west of Luesma village, calcareous siltstone of the lower part of Cystoid Limestone Formation; Geographic coordinates $41^{\circ} 9^{\prime} 51^{\prime \prime} \mathrm{N}, 1^{\circ} 9^{\prime} 10^{\prime \prime} \mathrm{W}$.

Spanish Central Iberian Zone. - Sampled localities: Co 1 (N-420 road section), about 300 m east of the bridge over Jabalón River, fine-grained calcareous sandstone of the top of the ‘Bancos Mixtos'; Geographic coordinates $38^{\circ} 53$ ' 16 " $\mathrm{N}, 4^{\circ} 0^{\prime} 54^{\prime} \mathrm{W}$. Jabalón River Section, about 4.5 Km north north-east ofCorral de Calatrava village, thin bed of ferruginous sandstone interbedded in the lower part of the "Cantera Shales"; Geographic coordinates $38^{\circ} 53^{\prime} 31^{\prime \prime} \mathrm{N}, 4^{\circ} 3^{\prime} 35^{\prime} \mathrm{W}$.

Cantabrian Zone. - Sampled localities: VPL, about 1200 m south-east of Portilla de Luna village, Portilla de Luna Limestones; Geographic coordinates $42^{\circ} 49^{\prime} 26^{\prime \prime} \mathrm{N}$, $5^{\circ} 49^{\prime} 6^{\prime \prime} \mathrm{W}$.
