

Trigoniidae of the Dogger of Łęczyca (Central Poland)

Halina Pugaczewska

Acta Palaeontologica Polonica 21 (1), 1976: 79-96

From the Dogger deposits of Łęczyca near Kutno there are described 12 pelecypod species representing 3 genera: *Trigonia* Bruguiere, *Myophorella* Bayle, and *Vaugonia* Crickmay. One new species, *Trigonia crebraecostata* sp.n., is described. The results of studies on morphology, variability, development of shell, as well as on shell structure and microornamentation are given.
