ACTA PALAEONTOLOGICA POLONICA

Bivalve nature of Huene's dinosaur *Succinodon*

Krystyna Pożaryska and Halina Pugaczewska
Acta Palaeontologica Polonica 26 (1), 1981: 27-34

The revision of Lower Paleocene fossils identified as *Succinodon putzeri* by Huene (1941) showed that they represent remains of boring bivalves of the suborder Pholadina. The structure of tubes and the marine origin of rocks in
which they occur make possible to assign them to *Kuphus* Guettard 1770.

Key words: Teredinidae, Bivalvia, Montian.
