

***Goyocephale lattimorei* gen. et sp. n., a new flat-headed pachycephalosaur (Ornithischia, Dinosauria) from the Upper Cretaceous of Mongolia**

Altangerel Perle, Teresa Maryńska and Halszka Osmólska

Acta Palaeontologica Polonica 27 (1-4), 1982: 115-127

A new representative of the pachycephalosaur family Homalocephalidae Dong is described, which comes from the Upper Cretaceous deposits of the Gobi-Desert, Mongolian People's Republic. It is more primitive and probably stratigraphically older than *Homalocephale calathocercos* known from the Upper Cretaceous Nemegt Formation of the Gobi Desert. The diagnosis of *H. calathocercos* is revised.

Key words: dinosaurs, Ornithischia, Pachycephalosauria, Cretaceous, Mongolia.
