

Contributions to the Lower Carboniferous Cyrtosymbolinae (Trilobita)

Halszka Osmólska

Acta Palaeontologica Polonica 13 (1), 1968: 119-150

Seven species and subspecies of the Lower Carboniferous Cyrtosymbolinae Hupe from Poland and Great Britain are described, including 5 new ones. They are assigned to 5 subgenera (one new) of the genus *Archegonus* Burmeister, 1843 (emend. Hahn, W65). *Archegonus (Cyrtoproetus)* Reed, 1943 is revised. The relation between *Archegonus (Phillibole)* R. & E. Richter, 1937 and *Liobole* R. & E. Richter, 1949 is discussed. Also described is the ontogenetic development of *Archegonus (Phillibole) aprathensis richteri* n.subsp.
