

Famennian Phacopidae from the Holy Cross Mountains (Poland)

Halszka Osmólska

Acta Palaeontologica Polonica 03 (2), 1958: 119-148

Nine species of the Famennian phacopid trilobites are described from the southern part of the Holy Cross Mts. In addition to forms already recorded from this area the writer describes some species never before found in Poland, as well as two quite new species, namely: *Trimerocephalus polonicus* and *Dianops? trifolius*.
