

Lower Lias ostracodes of the Tatra Mts. (West Carpathians)

Janusz Błaszyk and Andrzej Gaździcki Acta Palaeontologica Polonica 27 (1-4), 1982: 129-136

An assemblage of Lower Lias (Hettangian-?Sinemurian) ostracodes is reported for the first time from the Tatra Mts. Six ostracode species (including a new one *Ogmoconchella? carpathica* Błaszyk sp. n.) are recognized in the basal clastics of the Kopienlec Formation (Fatricum). Their stratigraphic range corresponds to the foraminiferal *Ophthalmidium leischneri* and *Ophthalmidium walfordi* Assemblage Zone (sensu Gaździlcki 1982).

Key words: ostracodes, Lower Lias, Tatra Mts., Poland.
